CASO DO MÊS SBP
ESTHER OLIVA
MÁRCIA HELENA CASTRO (R2)

DADOS CLÍNICOS

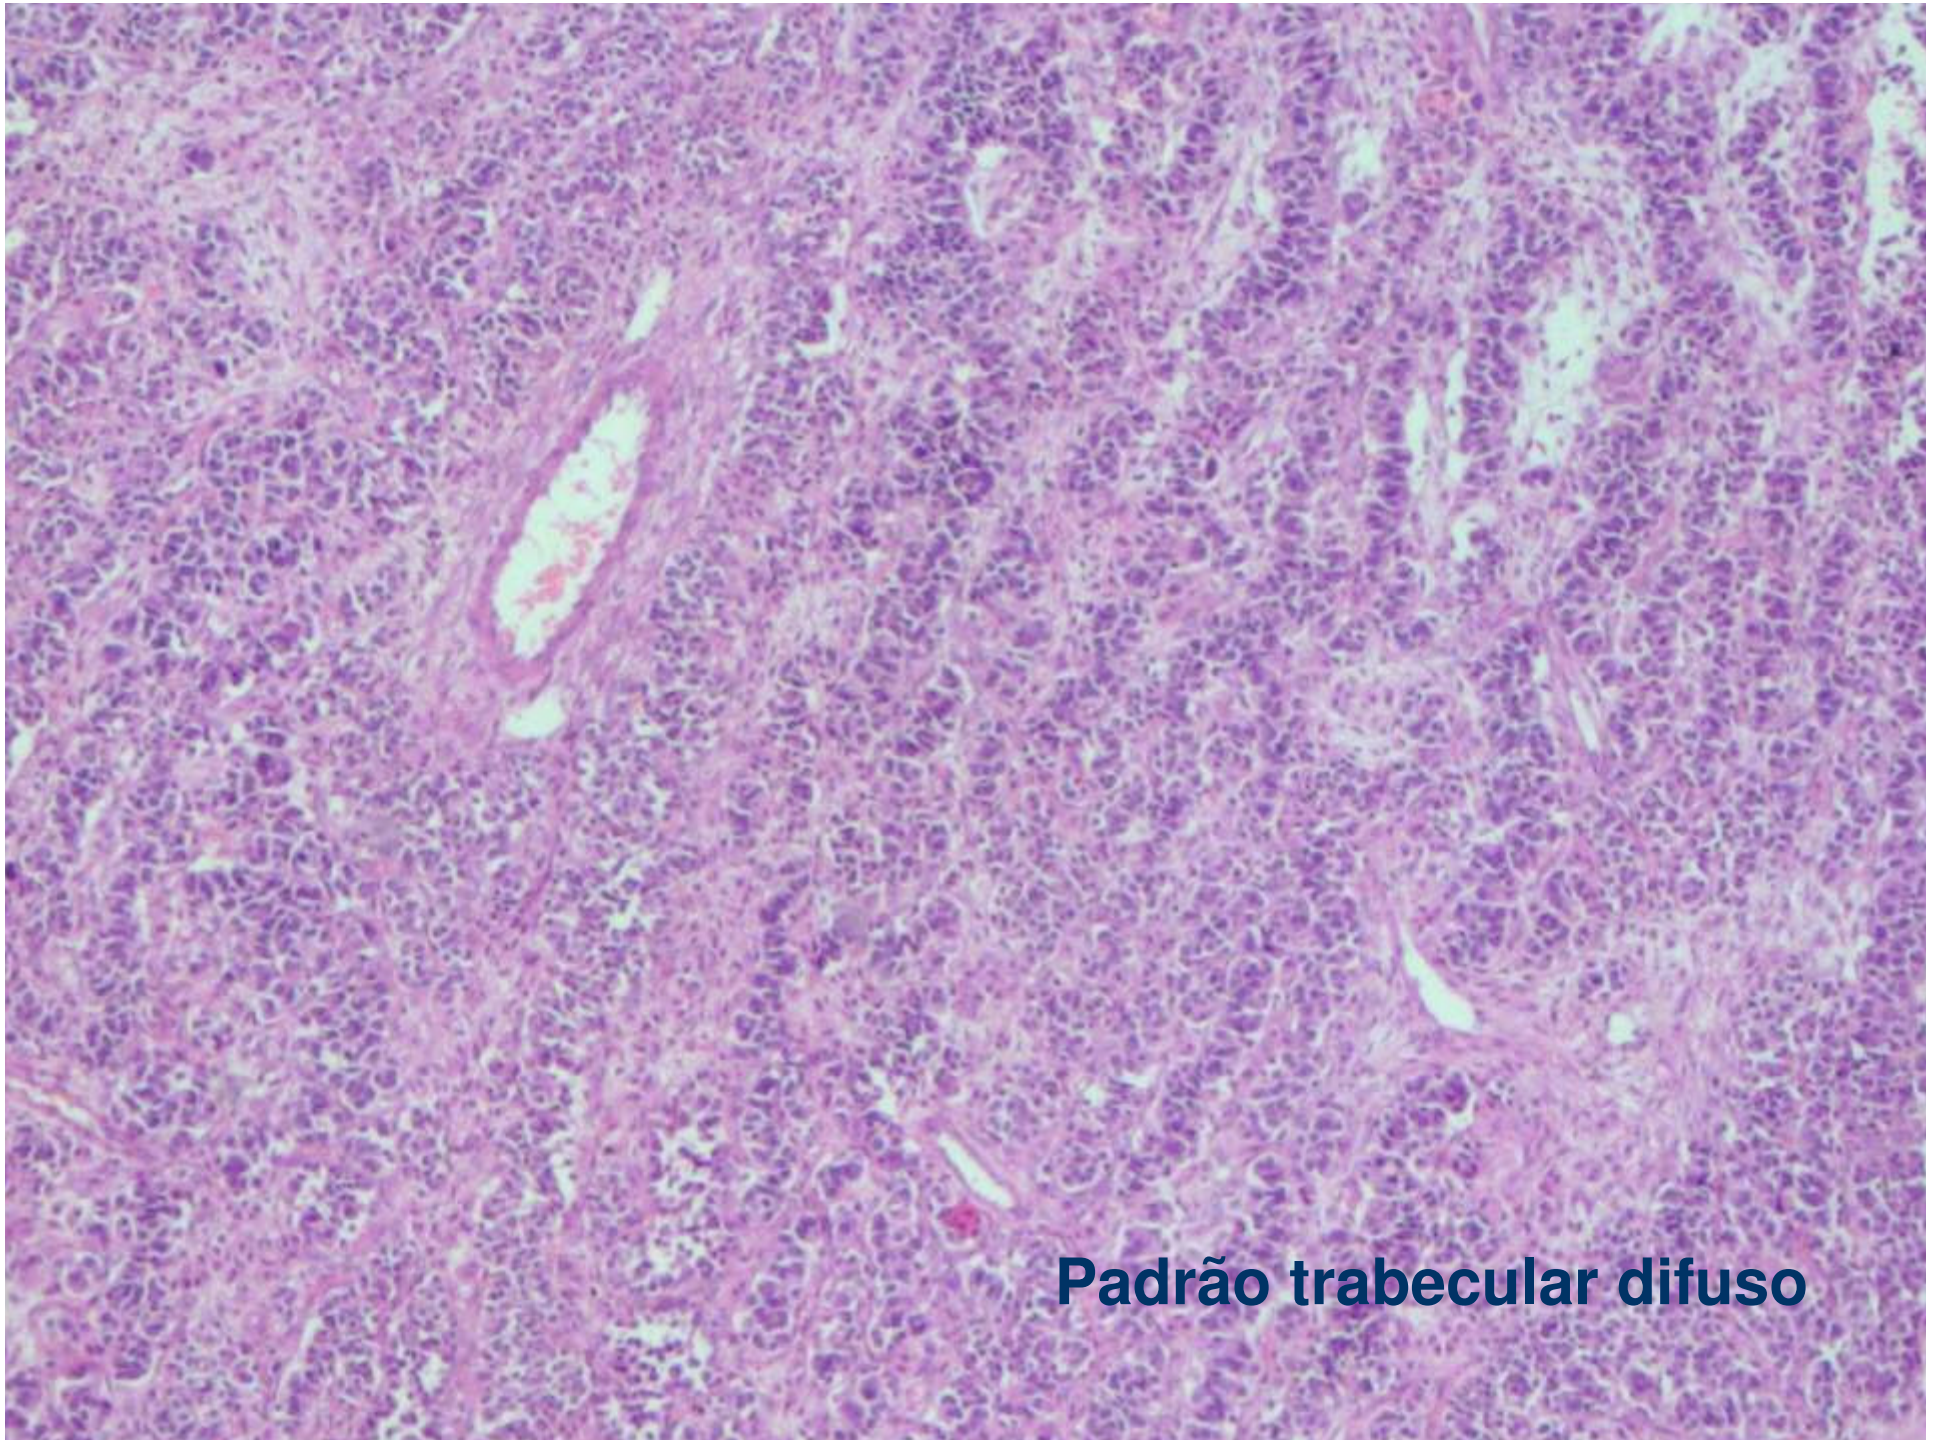

- ◆ 25 anos
- ◆ Hiperandrogenismo
- ◆ Massa ovariana direita

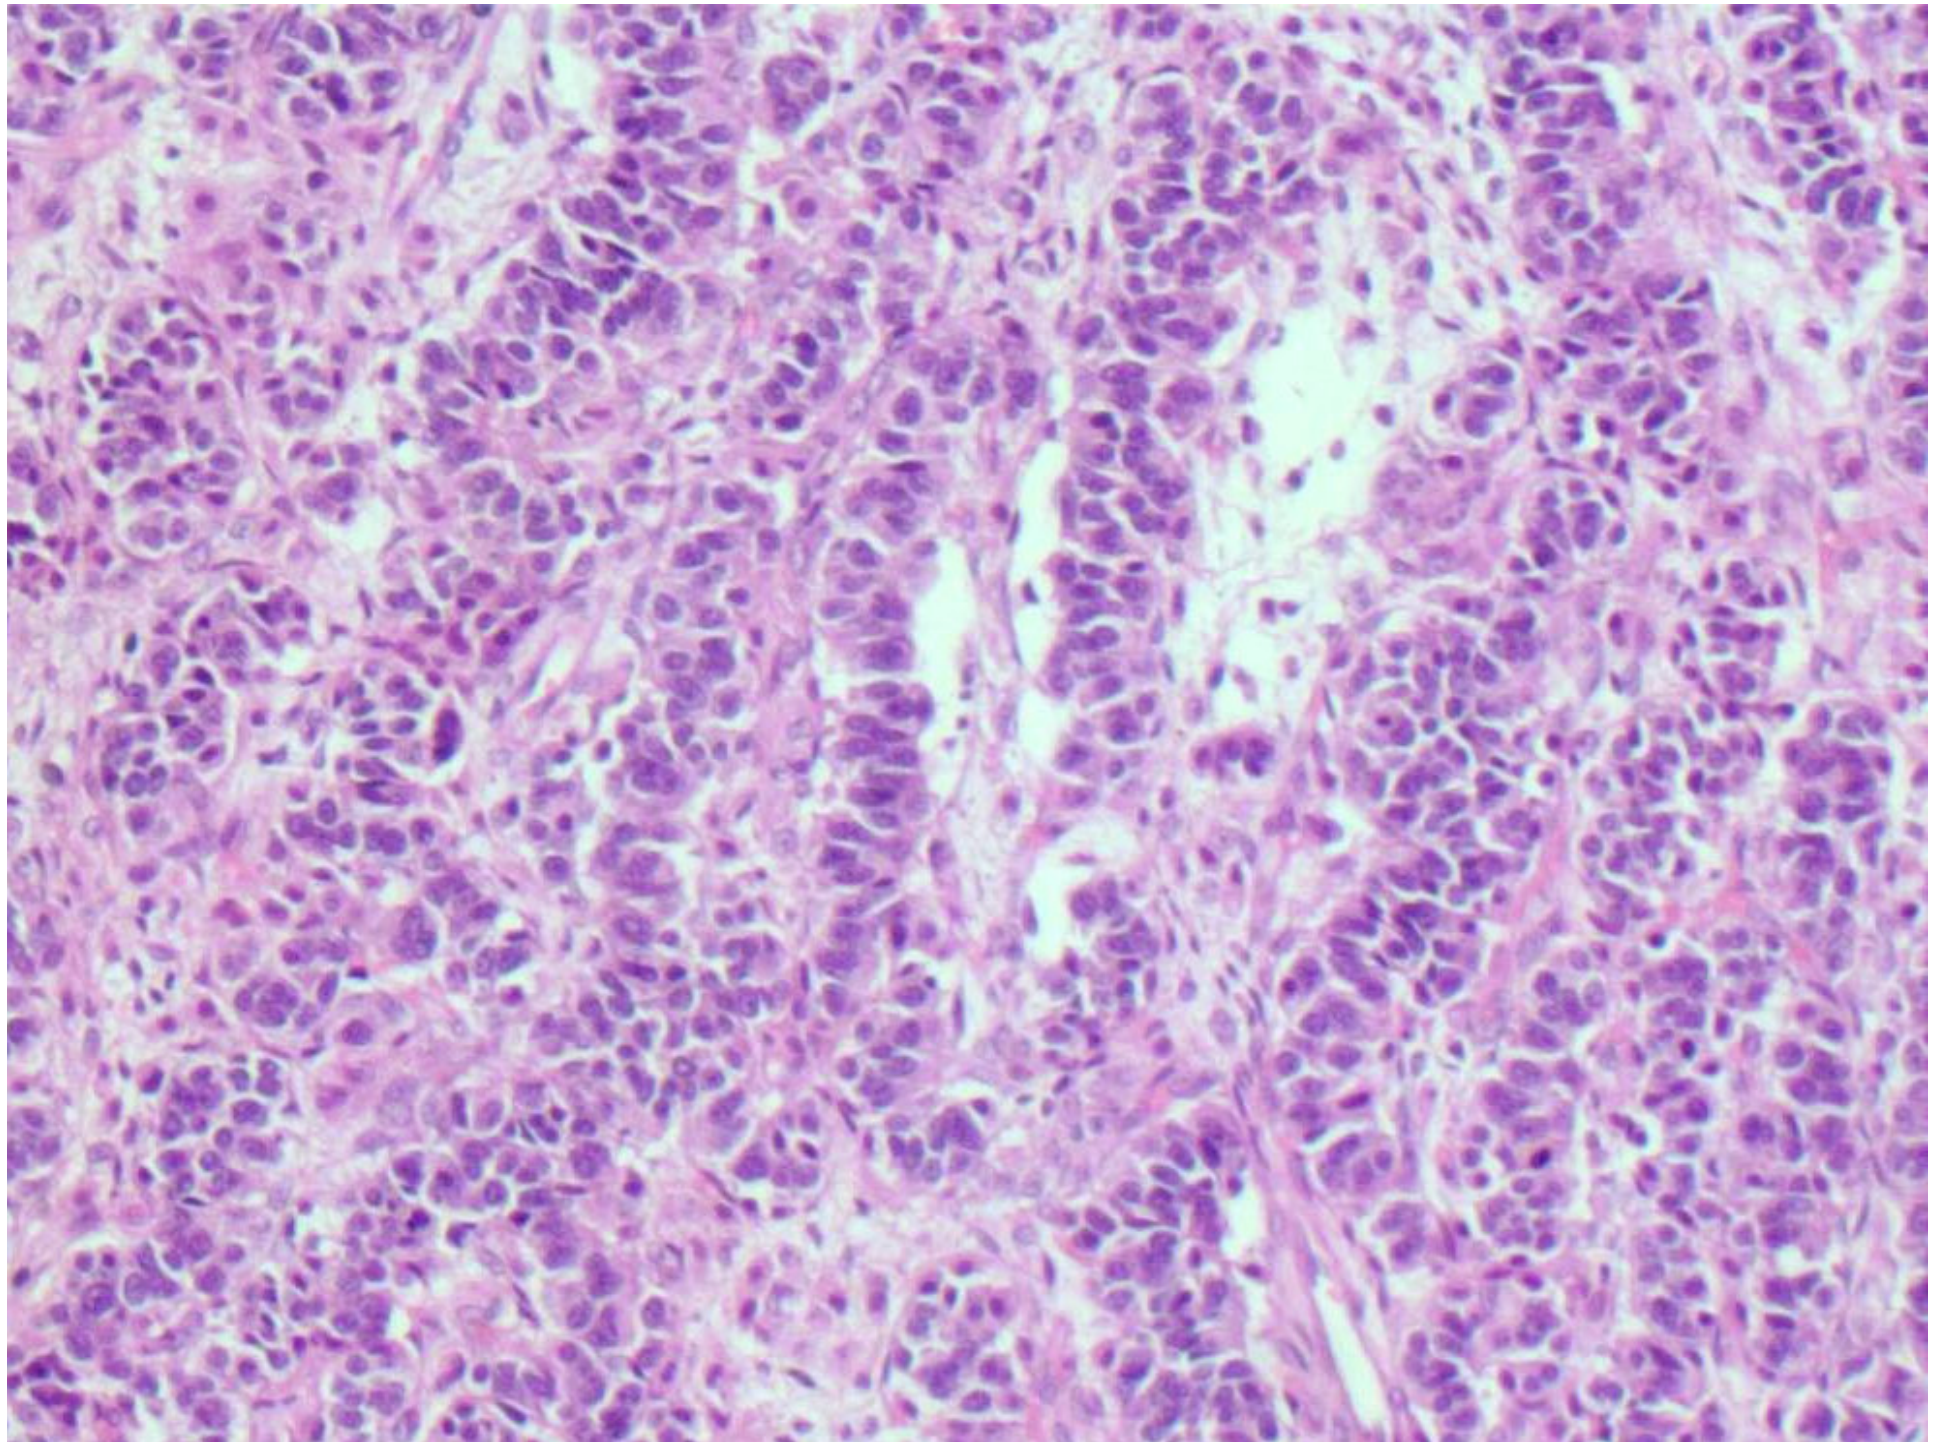

MACROSCOPIA

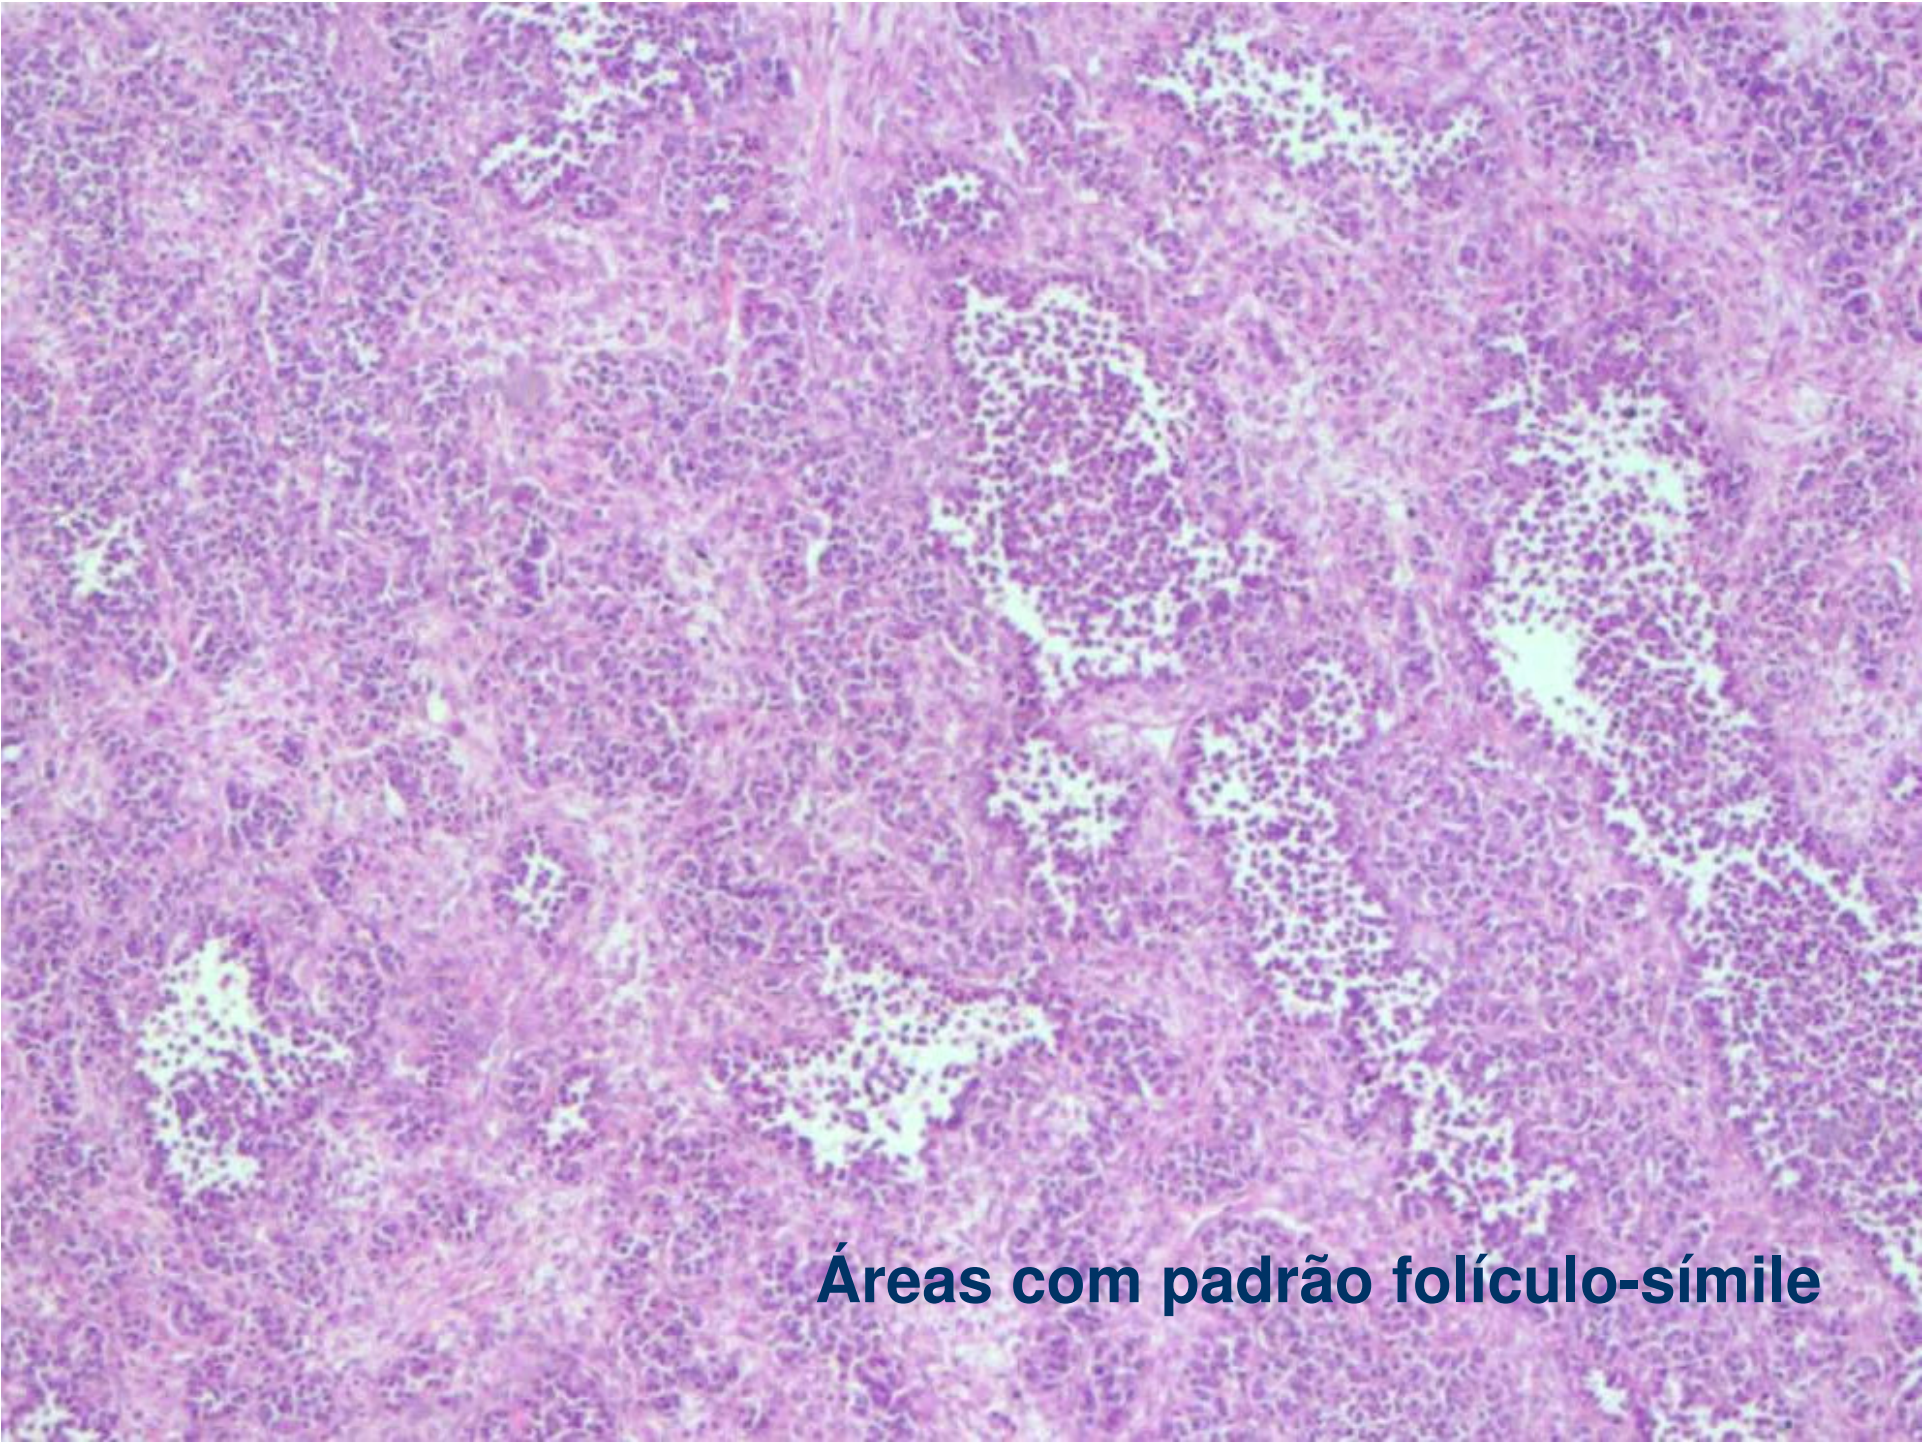

- ◆ Massa cística (6 litros de fluido)
- ◆ Superfície externa lisa
- ◆ 30 cm de diâmetro
- ◆ 5 kg

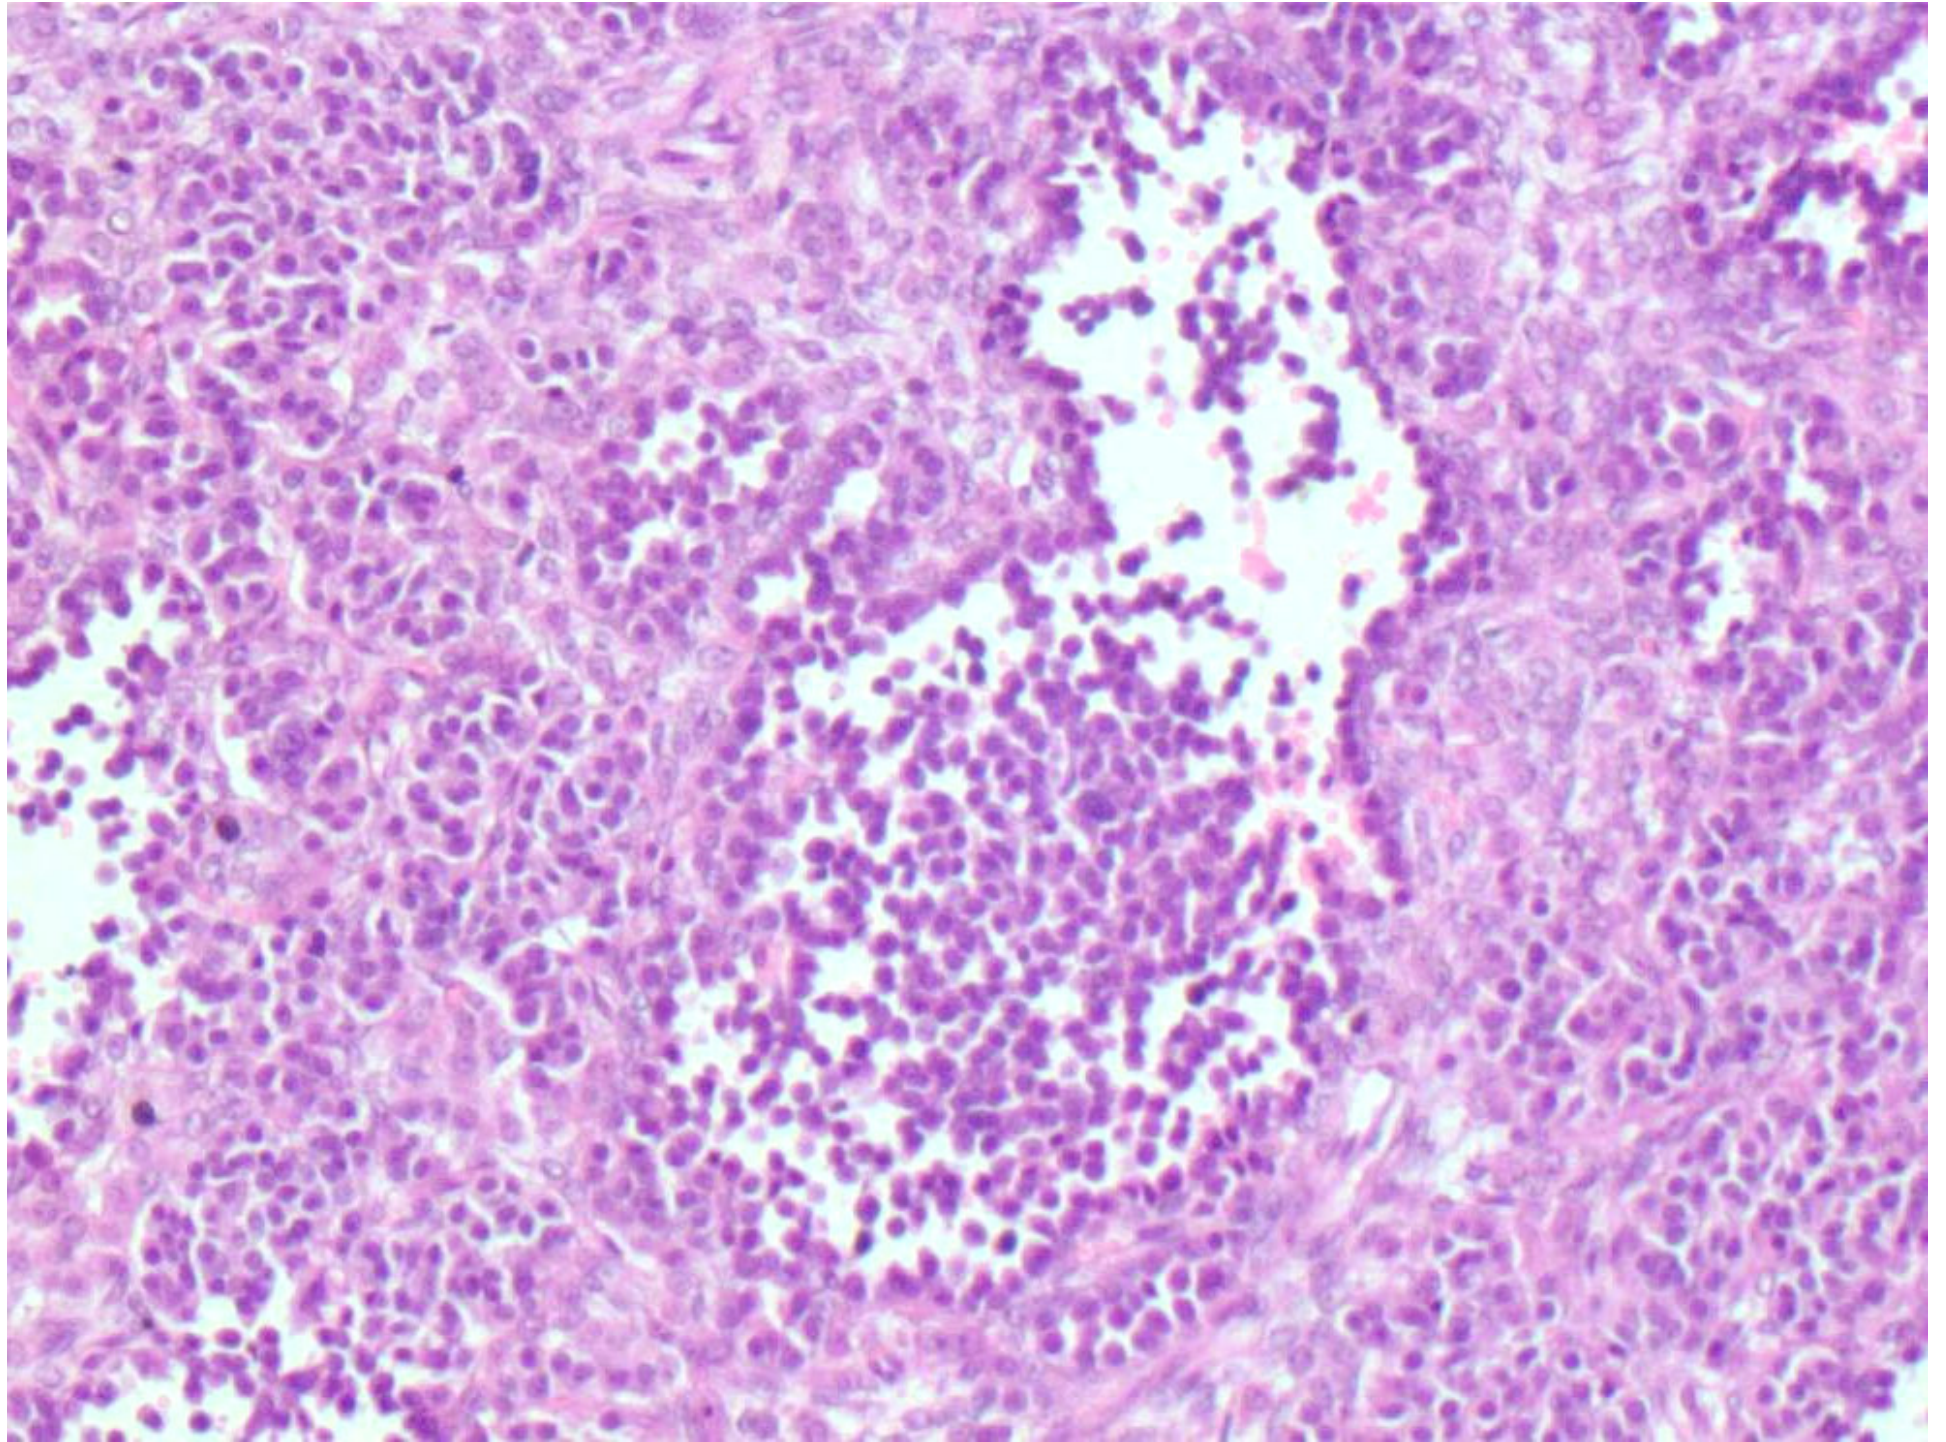

Padrão trabecular difuso

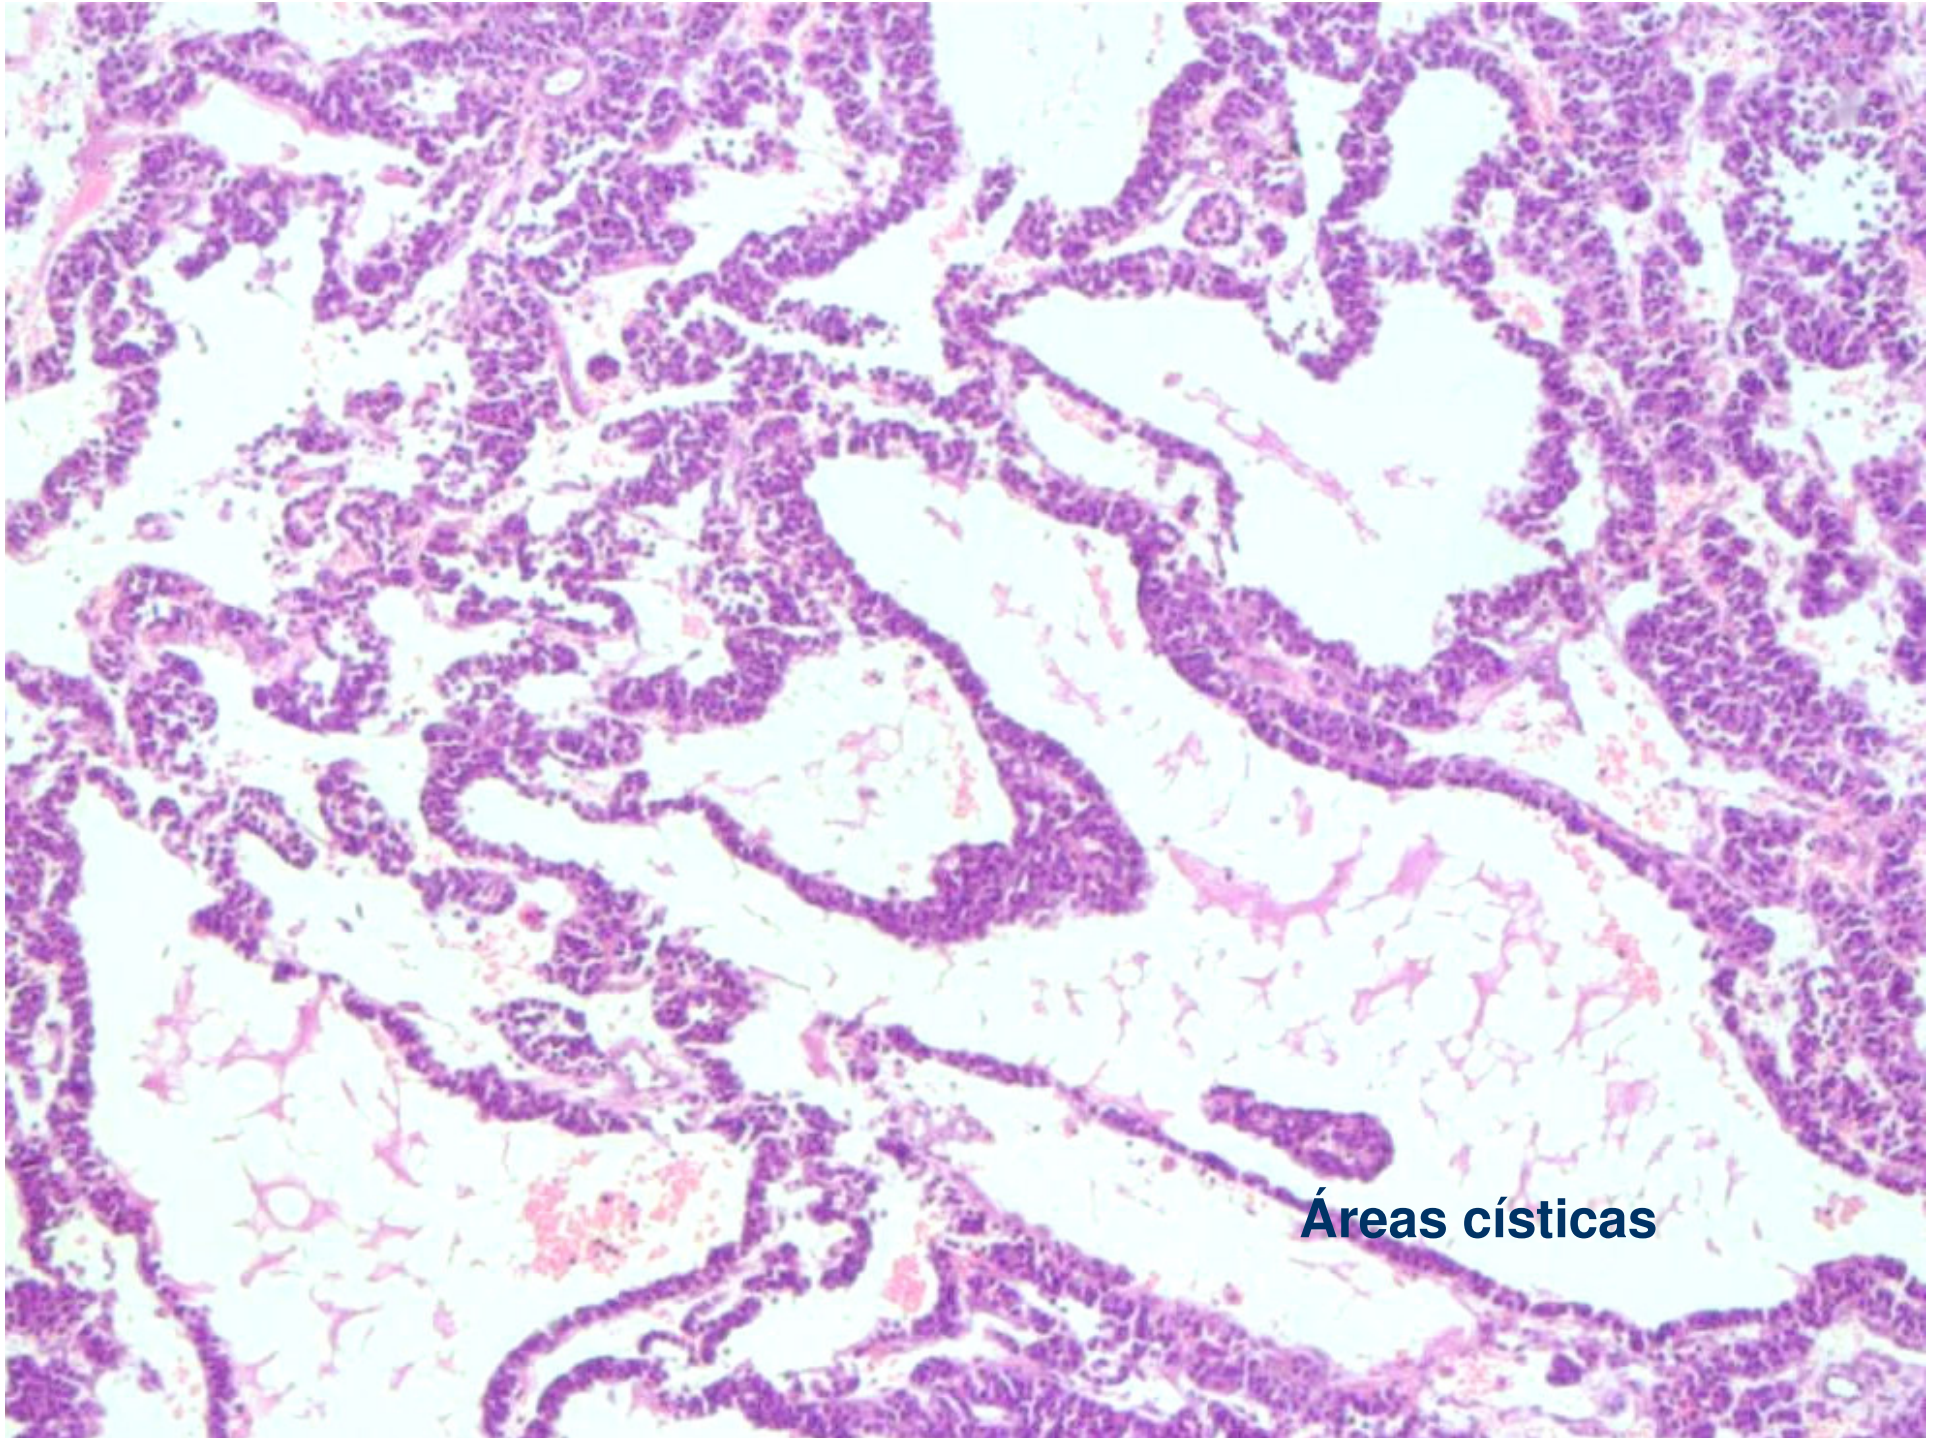

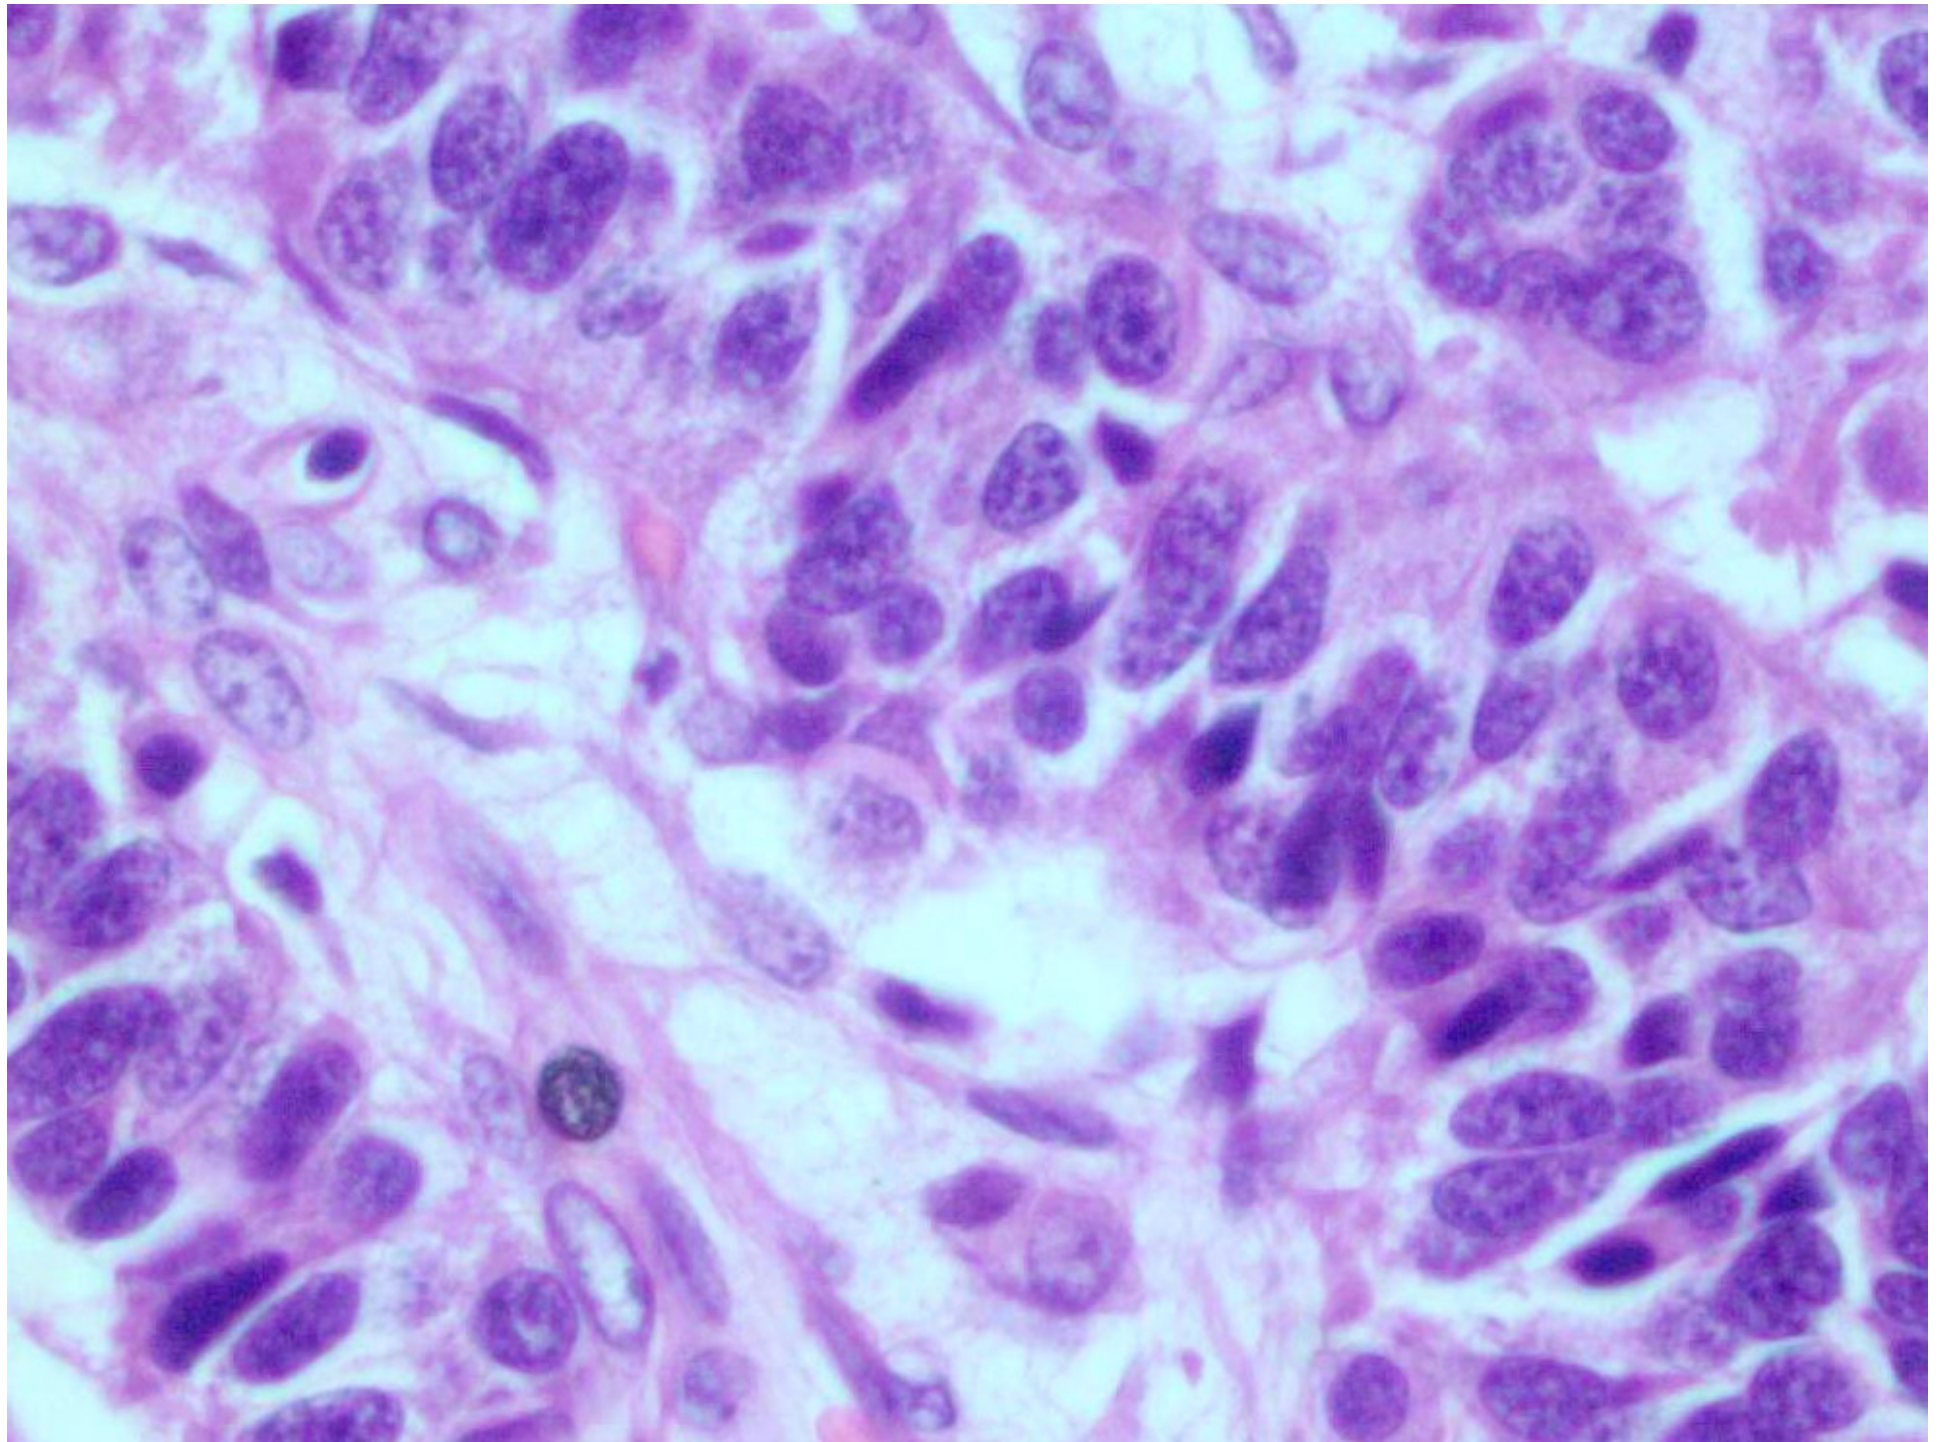

Áreas com padrão folículo-símile

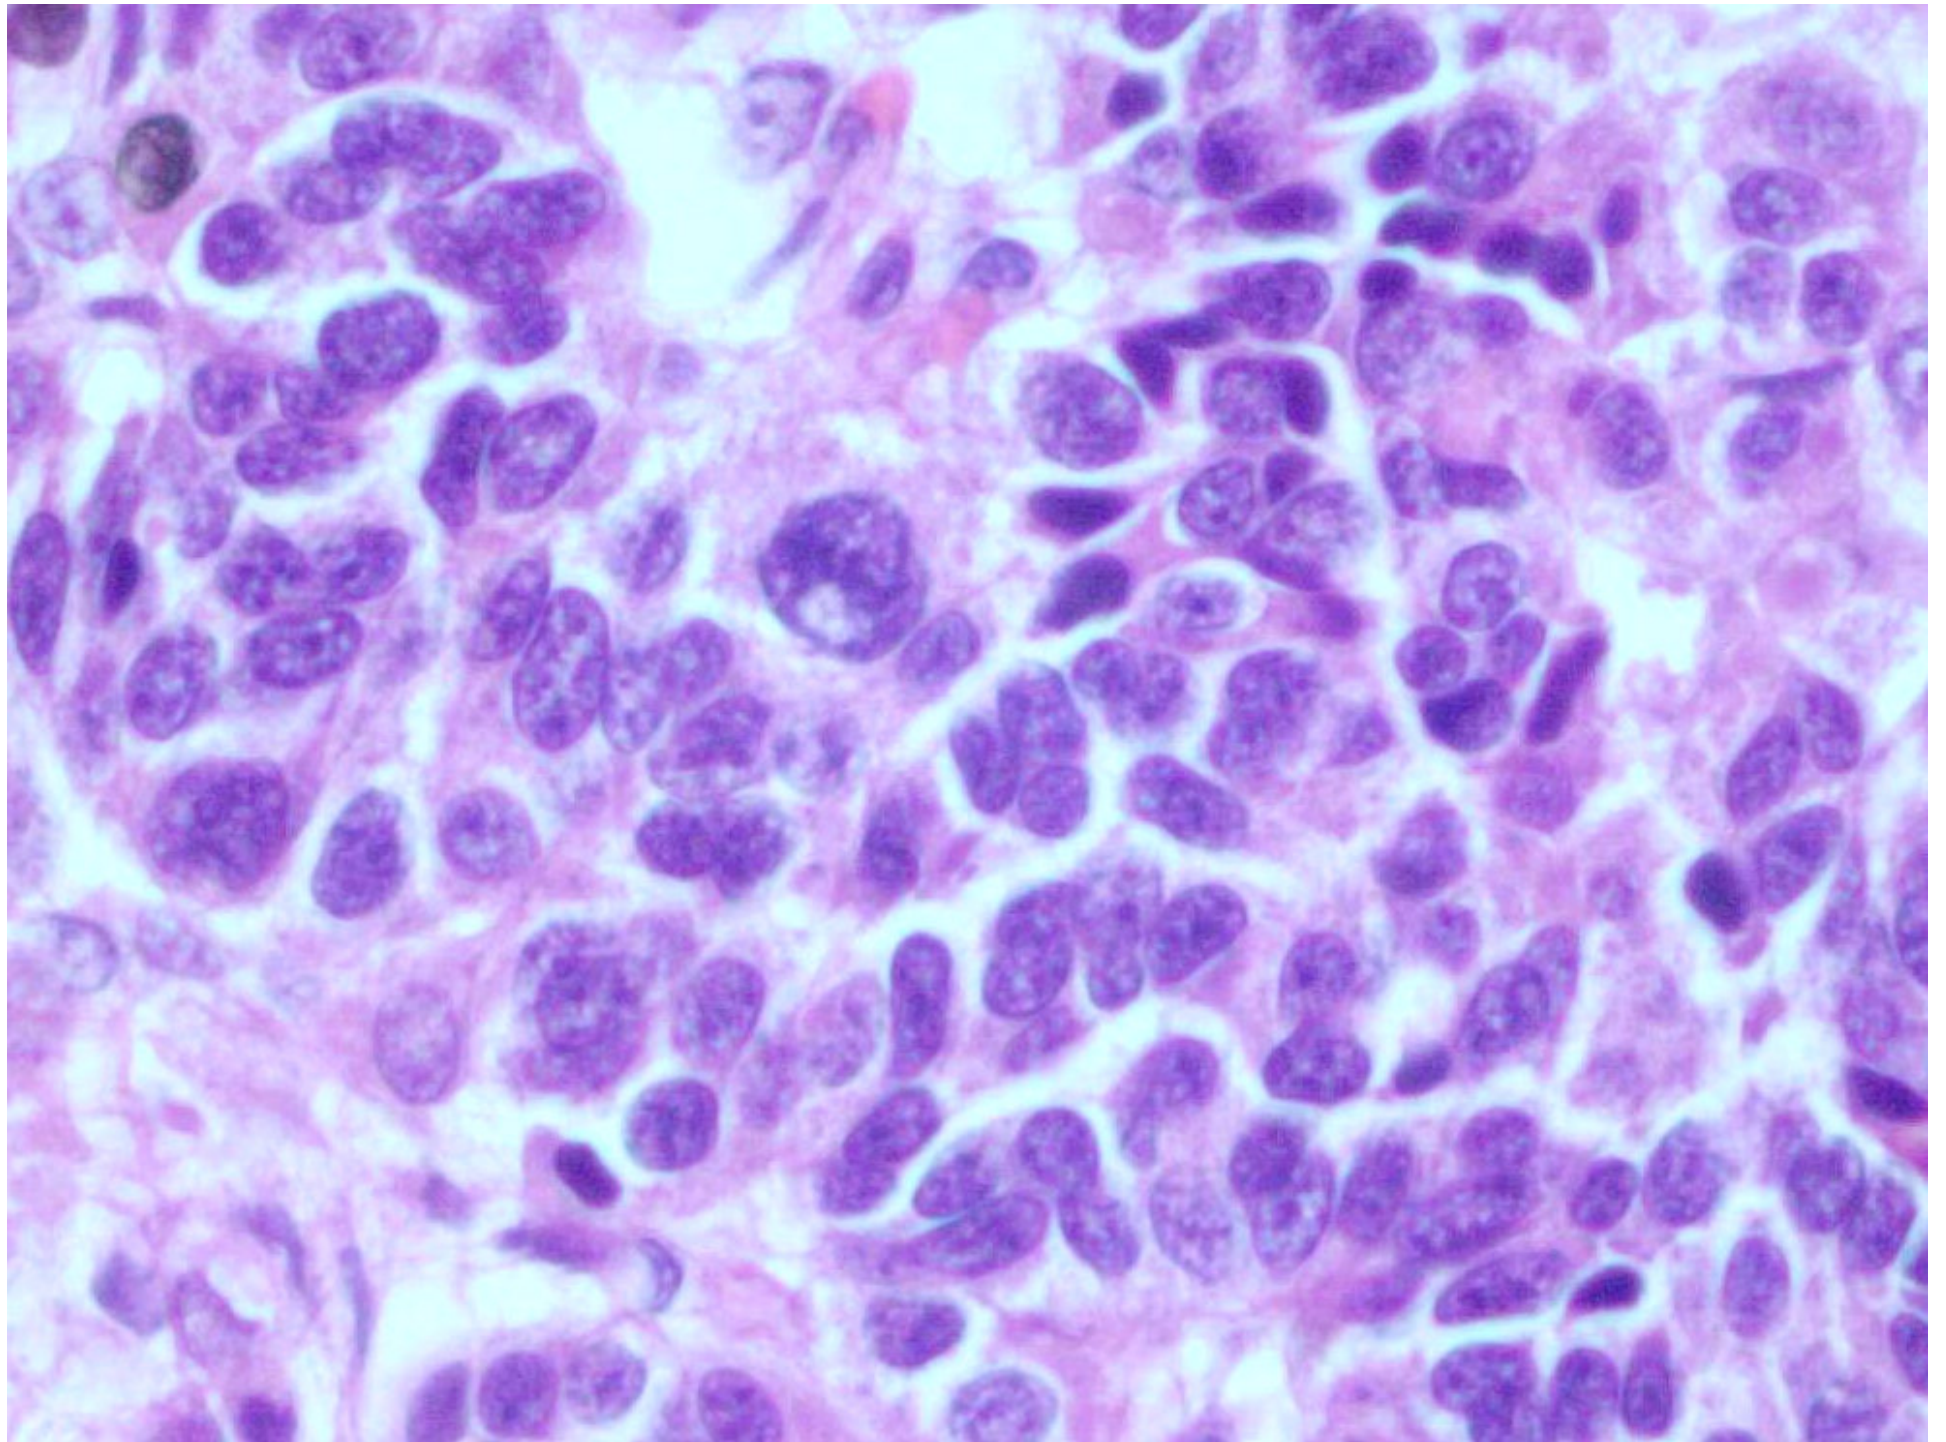

This histological slide, stained with hematoxylin and eosin (H&E), displays a dense population of cells with a prominent pink-stained extracellular matrix. Several distinct, rounded or oval clusters of cells are visible, which are described as having a follicle-like pattern. These clusters are composed of cells with dark, basophilic nuclei. The overall architecture suggests a neoplastic process, possibly a type of sarcoma or a metastatic lesion, where the tumor cells are organized into these follicular structures within a desmoplastic stroma.

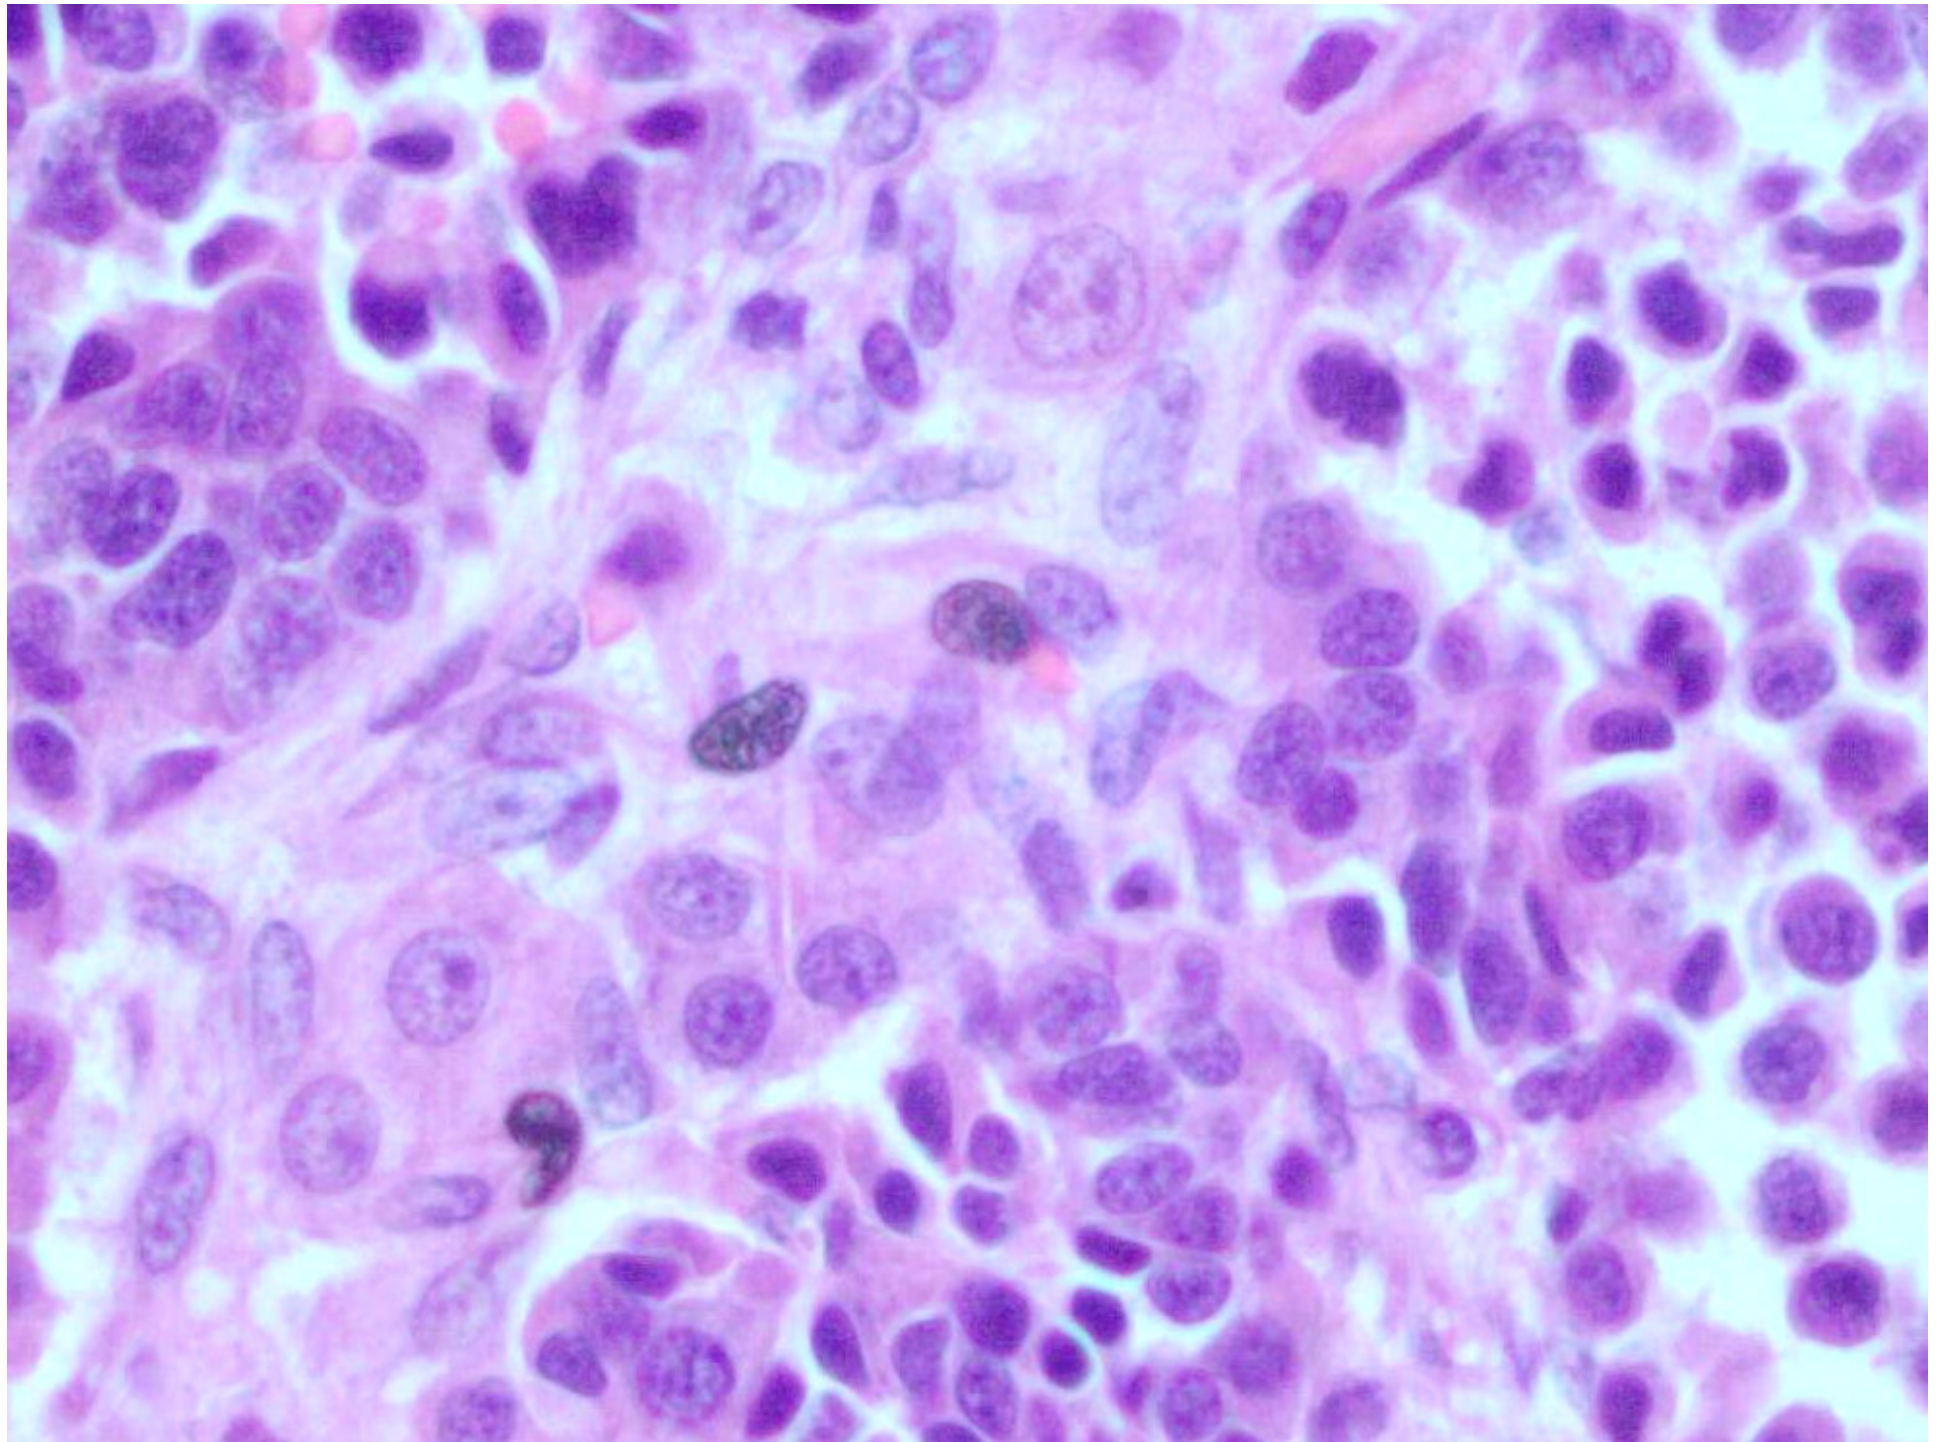

Áreas císticas

IMUNO-HISTOQUÍMICA

- ◆ Cromogranina: positivo
- ◆ Sinaptofisina: positivo
- ◆ Inibina: negativo

ESCOLHA O MELHOR DIAGNÓSTICO:

- ◆ Tumor carcinóide ovariano
- ◆ Tumor de células de Sertoli-Leydig
- ◆ Carcinoma de pequenas células
- ◆ Tumor de células da granulosa

A SBP agradece a sua participação
